SCISSORS

SCISSORS EXTENDED

SCISSORS TRASPORTINO MODE

Scissors, made entirely of aluminum, is the ideal machine for manual handling of coffins in cemeteries. Its low loading height allows it to be used directly from the hearse unloading phase. It transports the coffin easily over slopes and uneven ground. The scissor lift system enables direct entombment up to the 4th row of niches, or transfer to the **Magister** coffin lift for greater height reach.

Equipped for safe and efficient operation, it includes:

- 1 front pneumatic steering wheel Ø300x130 mm
- 2 rear fixed pneumatic wheels Ø400x160 mm
- Electromagnetic brake release
- Motorized traction (on the automatic model)

CODE	MODEL	WEIGHT (KG)	DIMENSIONS (CM) LXWXH	CAPACITY (KG)	HEIGHT MIN/MAX (CM)	LIFT	MOVEMENT	POWER
CS01	Manual	215	175X80X69	200	69-240	Manual	Manual push	—
CS02	Automatic	300	175X80X69	200	69-240	Electric + Manual	Motorized dual-wheel with differential axle	24V

OPTIONAL ACCESSORIES

CODE	DESCRIPTION
CASR	Rotating supplementary platform
CASX	Raised supplementary platform (+80 cm)
CASB	Pair of extendable arms for lateral tumulation
CAST	Waterproof PVC cover
