BICY STRETCHER

The Bicy model stretcher features an elegant and functional design. Its bicycle-spoked wheels provide both style and practicality. This coffin stretcher is made of powder-coated black steel tubing. To facilitate manual handling of the coffin, it comes equipped with a removable upper carrier frame featuring four handles, two of which are extendable and adjustable in length. The brake with parking lock allows movement and secure stopping on sloped surfaces.

The coffin rests on three crossbars with plastic protection, and two spring-locking buckle straps ensure firm anchoring.
