

TECHNICAL SHEET

LP1 STRETCHER

Made entirely of black-painted steel tubing structure, LP1 is a sturdy and essential coffin trolley. The coffin rests on three crossbars with plastic protection, and two spring-locking buckle straps ensure secure anchoring.

Its puncture-proof wheels—two fixed rear wheels and two swivel front wheels with brakes—ensure maximum reliability:

- 2 fixed rear solid wheels Ø260x85
- 2 front swivel solid wheels with brake Ø260x85

A push handle and two extendable knobs with spring pins for position locking complete its maneuverability.
